Chassis Straightening

Waimea Engineering Chassis and Repair Capabilities

When it comes to repair work in heavy transport there is no room for complacency especially in the logging industry. Waimea Engineering has extensive experience in this area and since 1996 has been involved with the repair and maintenance of a wide range of heavy transport vehicles. The company prides itself on ensuring critical attention to detail and having robust repair systems in place to carry out major chassis repairs and alterations on any manner of heavy equipment.

Waimea Engineering utilises a purpose-built repair system that is both user friendly and safe. Regardless of mobility, vehicles can be set up very quickly. Jacking frames are simply slid into place and bolted down where required.

The company has an excellent reputation in the industry for producing work to a very high standard and will project manage everything from retrieval to delivery. Whether it be minor repairs or a full strip down and chassis replacement choose Waimea Engineering as your repairer and ensure the highest quality in an industry that demands nothing less.

A twisted “B” train trailer easily straightened without heat, cutting or welding.

Extensively damaged excavator repaired swiftly and economically.

Twisted log trailer repaired beyond expectation and within budget.
